## Orton-Gillingham Word List

The Orton-Gillingham Word List was developed to assist teachers and tutors in their lesson planning. It begins with the sounds - consonants, short vowels, consonant digraphs, letter combinations, and vowel teams. This is followed by a list of learned words or red flag words and sections on homonyms, contractions, plurals, and rules for adding suffixes. There is also a section on syllabication - vc/vc, v/cv, vc/v, and other patterns. The last portion deals with morphology - prefixes, roots, Greek combining forms, and suffixes.

Of note, the "Sound" and "Syllabication" sections are arranged via the attached "Scope and Sequence."

**Doubling or 1-1-1 Rule (Part 2):** For words of two or more syllables, you will double the final consonant of the base word when adding a suffix beginning with a vowel IF the last syllable ends with a single consonant with one vowel before it and IF the accent falls on the last syllable. Of note, accents do not normally fall on prefixes and in two syllable words, the accent usually falls on the first. Also, if the last syllable is "mit," it almost always gets the accent.
