Dear Educator,

Thank you for your purchase! This is a set for words with digraph, PH. It is compatible with OG instruction or other reading interventions. This resource may be used in a 1:1 setting, small group or even whole class, depending on your needs.

NOTE: Please pay special attention to the Table of Contents. This is the order of instruction I recommend. It progresses from words and sounds, to sentences and a fully decodable story. Games are included at the end to use at any point in your instruction. They make great review centers.

If you enjoyed using this set, please be sure to check out my other multi-sensory skill practice sets. I add about 3 new phonics resources every month to my store.

Thank you so much for choosing my store for your classroom needs. I do appreciate your patronage. Please be sure to leave feedback on this resource. It helps me, future customers, and you'll earn credit towards new purchases!

Sincerely,

Emily Gibbons, [The Literacy Nest](#)

The Phone: Then and Now

Many years have gone by from the time the phone was invented by a man with the last name Bell. Bell might get quite a surprise if he checked in to see how the phone morphed.

A phone might no longer need to be fixed to a wall for good. Many have a phone on them all the time. No matter where one may go, a phone will be in a hand, on an ear, or in a bag or coat.

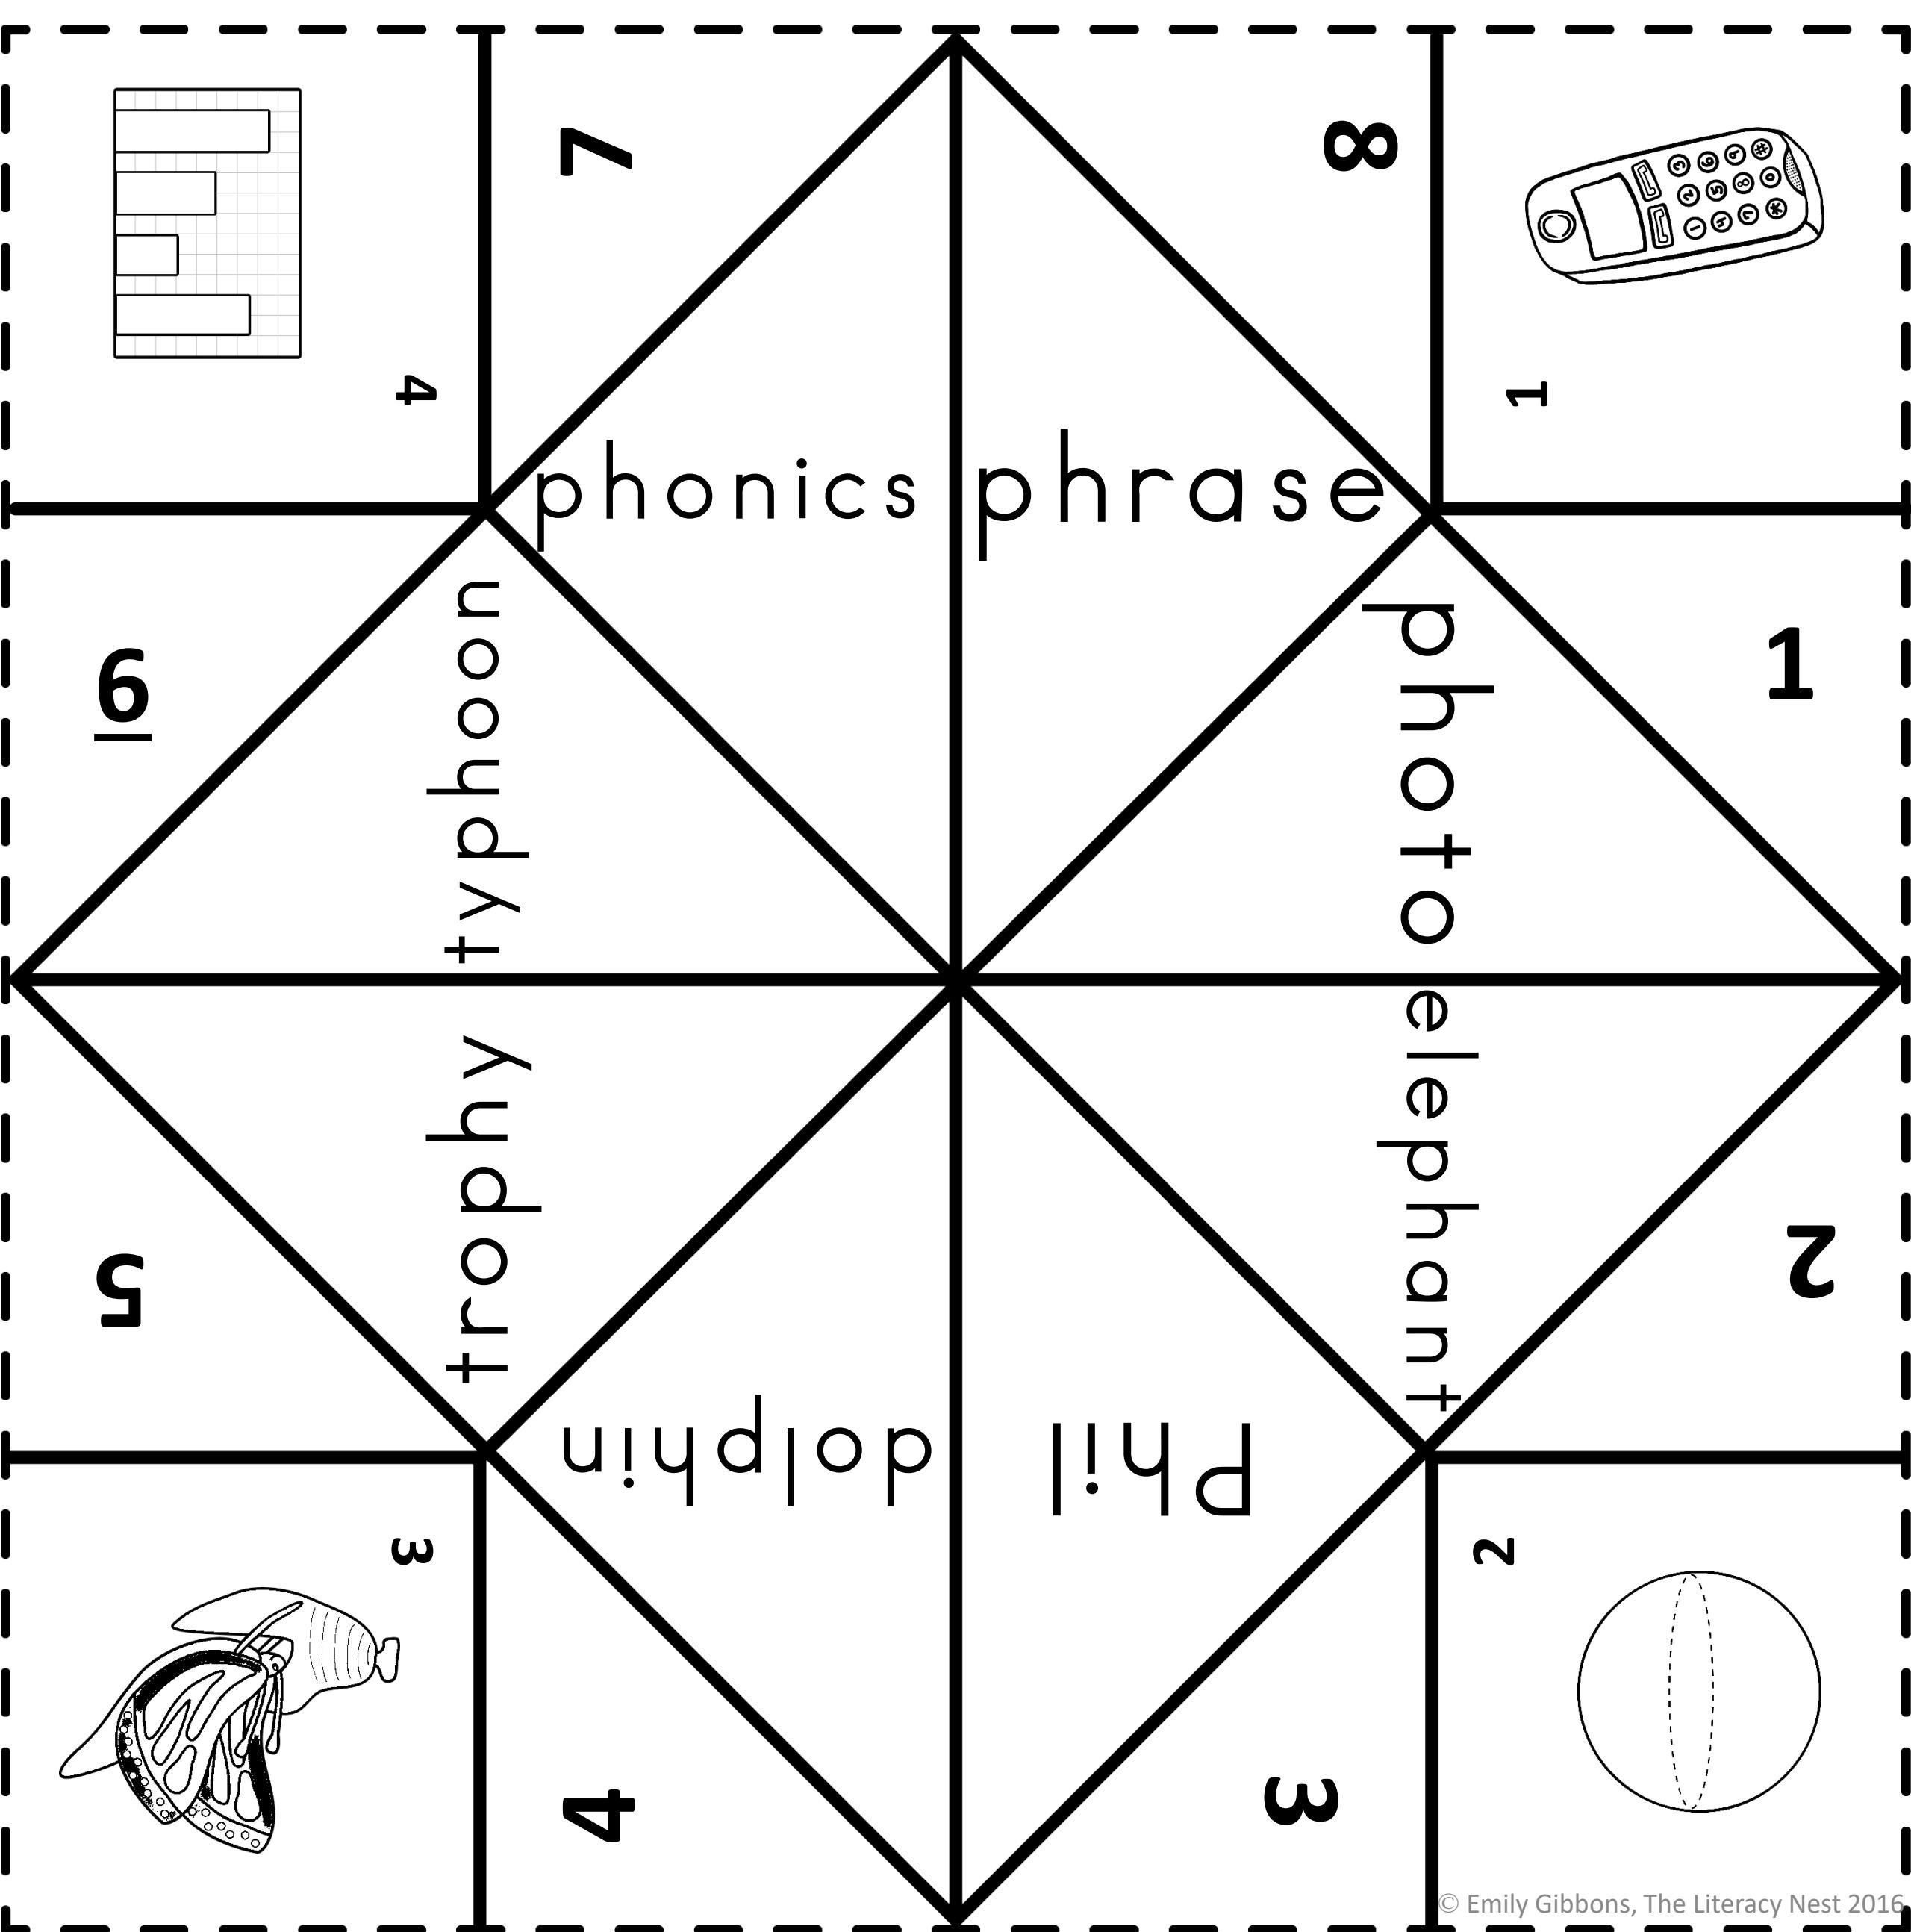

Payphones could be found on many street corners, in shops or in hallways. When one needed a phone, and they were not at home, they would stick a dime or quarter in a payphone to make a call. Now there are not many payphones at all. Most payphones were torn down. Why? Many have a phone on them and just do not need one.

Bell would have a big surprise if he spied to see how something he invented could play a huge part of one's life each day.
